

# PLASPITEC PROFILE REMOVER

Working with thermoplastic structured wall pipes requires sometimes special tools for cutting. The new Profile Remover of Plaspittec simplify to remove ribs and profiles of Polyethylene or Polypropylene pipes without damaging the waterway wall thickness. A special designed 40mm wide cutting device with micro-distance-holder provide you the possibility to prepare a smooth and clean surface!

If branches should be integrated and welded by handextruder, removing of profile is always necessary.

The Profile Remover is also very helpful for milling spigot ends on the site – for example if pipes with plain ends should be prepared for welding connection with couplers.

Due to the two-hand-operation, the Profile Remover is easy and safe to handle. The tool has an integrated biased-off switch and fulfill the requirements of CE-Conformity.

Power supply: 230 V, 1000 Watt  
Sizes and Weight: 36cm x 32cm x 20cm; 4kg  
Incl. transport box: 52cm x 43cm x 22cm; 9,5kg
